

Kolli Himaraga Varshith

kollivarshith123@gmail.com | linkedin.com/in/varshith-kolli | github.com/Varshith-092006 | Guntur, Andhra Pradesh

CAREER OBJECTIVE

Passionate Full Stack Web Developer skilled in the MERN stack, building responsive frontends and scalable backends. Specialize in RESTful APIs, JWT authentication, and third-party integrations. Experienced with version control, cloud deployment, microservices architecture, and database design. Eager to contribute to collaborative, real-world engineering projects.

EDUCATION

R.V.R and J.C College of Engineering

Guntur, Andhra Pradesh

B.Tech in Computer Science and Engineering | GPA: **8.9 / 10**

2023 – 2027

TECHNICAL SKILLS

Languages: C, Java, Python, JavaScript

Frontend: HTML, CSS, React.js, Tailwind CSS, Material UI, Figma, State Management, Leaflet.js

Backend: Node.js, Express.js, REST APIs, JWT, WebSockets, Socket.IO, Mongoose

Databases: MongoDB, PostgreSQL

Tools & DevOps: Git, GitHub, VS Code, Postman, Docker, Redis, Prisma ORM, Axios, Vercel, Render, Netlify, Microservices

PROJECTS

Real-Time Chat Application | *React, Node.js, Express, MongoDB, Socket.IO, JWT, Tailwind CSS* | [Live Demo](#)

- Developed a full-stack real-time chat application with instant one-on-one messaging using WebSockets and the MERN stack.
- Implemented secure authentication using JWT with cookie-based sessions; managed auth and socket state via Zustand and Context API.
- Designed a fully responsive UI featuring typing indicators and smooth real-time interactions using Tailwind CSS.

Emergency Services Locator | *React, Node.js, Express, MongoDB, Leaflet.js, Socket.IO, JWT* | [Live Demo](#)

- Built a real-time emergency response app enabling users to locate nearby hospitals and police stations on an interactive map.
- Integrated Leaflet.js for real-time maps with geolocation-based service discovery and live updates via Socket.IO.
- Secured all APIs and socket connections with JWT and cookie sessions; built a mobile-first UI with distance-based service sorting.

URL Shortener – Microservices Architecture | *Node.js, Express, React, Redis, Microservices* | [Live Demo](#)

- Architected a scalable URL shortener using a microservices design with Node.js, Express, and Redis for fast caching and instant redirections.
- Built independent services for link creation, redirection, and analytics with clean inter-service API communication.
- Developed a responsive React frontend for generating, viewing, and managing short URLs with a smooth user experience.

ACHIEVEMENTS

OptiQuest – DSA Coding Contest

1st Place among college participants

Cyber Security Talent Hunt

3rd Prize – Demonstrated strong cybersecurity and problem-solving skills

EXTRACURRICULAR ACTIVITIES

- Participated in a **national-level hackathon by Odoo**, contributing to collaborative problem-solving and rapid prototyping under time constraints.
- Participated in Agentathon, an **AI-focused hackathon** conducted by Google Developers Group (GDG) Hyderabad, collaborating on AI-driven solutions.
